Probably the smallest framed bull in the pen, but outgained most of his larger counterparts. Dam is a very moderate framed, easy fleshing M326 daughter with a very good udder. He is stout and big ribbed with eye pigment.

A naturally raised son of E70, the mother of Select Sires Magnum 434 bull, that she raised at age 15. Should sire tremendous longevity, low birthweight, good udders, and soundness in a very moderate framed package. I am interested in using him in my program.

A good haired, massive, wide topped, stout made bull that was one of the best bulls in the whole feed efficiency test. He combines top ADG with top F/G and top RFI - a hard combination to do. His mother is a real moderate, goggle eyed cow whose daughter had one of the very best ADG and RFI heifers in the entire test. It appears efficiency runs in the family.

A double bred, well marked Liberty that was a standout all summer. A really square made bull with a leg on each corner. He had some health issues early in the test that affected his ADG, but I am impressed with his F/G data.

A very long made, red legged, red necked 0709 bull with top data. His 117D mother is a very broody and feminine looking cow with a good udder and some good carcass data in the family. See picture.

One of the top bulls of the offering. A wide chested, thick backed bull with excellent data on performance, feed efficiency and RFI. He is backed by a top cow family with good production ratios.
